

## Women Counseling Information System (WCIS)

WCIS is a tool to manage a women counseling center in an efficient way. The aim of WCIS is to strength the centers and their counselor by providing help on case management, women laws, research activities, case handling etc at Each Center.

WCIS has two main modules :

- Data Entry Module provides options for viewing, changing and upgrading the data on cases, laws, etc
- Analysis Module provides the analysis of data for planning of strategies towards Women Development.

Facilities provided :

- Counseling Concepts
- Case Data Maintenance
- Data Analysis Tools
- Laws Update
- Report Generation
- Address book
- Letter typing in regional language
